Da Nang University of Technology and Education (ĐH Sư Phạm Kỹ Thuật - ĐH Đà Nẵng), Major in Information Technology. (2022 – 2026)

BLOG / TECHNICAL WRITING

Author of technical blog posts on Viblo.asia – sharing in-depth knowledge about modern web development:

- Advanced React Hooks: Build a Complete Application with Modern React Architecture
- React Performance Optimization – Memoization, Lazy Loading & Code Splitting
- ReactJS Advanced State Management – Context + Reducer Pattern
- Next.js là gì? Vì sao React Developer nên học Next.js
- ReactJS là gì? Vì sao Frontend Developer hiện đại không thể bỏ qua React

EXPERIENCE BY PROJECTS

Project Name: ERP SYSTEM – HIWEB.VN COMPANY (TNHH HiWeb.vn)

Duration	: 2025 – Present
Position	: Fullstack Developer
Description	: HiWeb provides Hosting, Domain, VPS and web infrastructure solutions. The ERP system manages large-scale data for multi-user enterprise operations with high scalability requirements.
Responsibilities	• Develop modern frontend interfaces using ReactJS and NextJS. • Build backend with PHP/Laravel following MVC and RESTful API patterns. • Implement Authentication & Authorization with role-based access control. • Handle complex business logic and large database optimization. • Design scalable system architecture for multi-user ERP. • Collaborate with team to develop extensible, high-load modules.
OS	: Windows, Linux
Languages	: JavaScript, PHP
Framework	: ReactJS, NextJS, Laravel
Techniques	: RESTful API, MVC, Git, SEO optimization
Work Location	: Da Nang, Vietnam.
